Abstract (en)

[origin: WO2019197234A1] A description is given of an oxygen scavenging aqueous lamination adhesive composition comprising (I) at least one lamination adhesive polymer dispersed or dissolved in an aqueous medium; (II) at least one photosensitizer compound; and (III) optionally at least one additive different from (I) and (II). Described are also laminates made by using said composition, for example for making film-to-film laminates, film-to paper laminates and packaging materials, in particular food packaging.
