Abstract (en)
[origin: WO2019197761A1] The invention relates to a dull-looking luminous device (2) for a motor vehicle, comprising an optical housing (4) containing a light source (6A, 6B) and at least one optical reflector (16) arranged in such a way as to direct a light beam emitted by the light source (6A, 6B), through an opening (14) of the optical housing, the opening (14) being closed by an external indicator light (18) in order to protect the light source (6A, 6B) and the optical reflector (16) from bad weather, characterised in that the external indicator light (18) has a dull appearance in the light of day, and in that a translucent screen (26) is inserted between the optical reflector (16) and the external indicator light (18), the translucent screen (26) being at a distance from the external indicator light (18).
