Abstract (en)
[origin: WO2019185256A1] The present invention relates to a gas burner group (1) comprising a gas burner body (2) generating flame by burning flammable gases and enabling a cooking container placed thereon to be heated, having an inner mixing chamber (3) in which gas and ambient air is mixed, feeding an inner flame crown, at least one vertical nozzle (4) enabling transmitting gas to the inner mixing chamber (3), at least one outer mixing chamber (5) in which gas and ambient air is mixed, at least one horizontal nozzle (6) enabling transmitting gas to an outer mixing chamber (5); a gas burner head (7) placed on the gas burner body (2), enabling transmitting flame to the base of a cooking container through the holes disposed around it; and a gas burner cap (8) placed on the gas burner head (7).
