Abstract (en)

[origin: WO2020177797A1] The invention relates to an apparatus for inserting and connecting at least one electronic component in a frame and/or a casement of a window, a door, a hatch or the like, having a housing which is insertable into the frame. According to the invention, the housing (5) is designed as a multifunctional and modular empty box (1) having at least one adapter liner (6) which is insertable into the housing (5), which is permanently inserted into the frame (31).
