Abstract (en)  
[origin: WO2019192740A1] Apparatuses, methods and computer programs are described comprising receiving a sequence of messages at a correction module of a transmission system, wherein the transmission system comprises a transmitter, a channel, the correction module and a receiver, wherein the correction module includes a correction algorithm having at least some trainable weights; converting the received sequence of messages into a converted sequence of messages using the correction algorithm; receiving a reward or loss function from the receiver based on the modified sequence of messages; and training at least some weights of the correction algorithm based on the received reward or loss function.
