Abstract (en)
A skylight window (1) for being installed in or on a roof (2) of a building is disclosed. It comprises a window frame (7) having four frame side members (10), where at least some of said frame side members comprise a groove (50) configured to receive an edge of a lining panel. An Insulating Glazing Unit (IGU) (5) is supported on the window frame, and a weather shield pane (3) is arranged to protect the window frame (7) and the IGU (5). An exposed frame surface (77) of the frame side member extends between the groove (50) and the IGU (5), said exposed frame surface having a first edge (771) at the groove and a second edge (773) at an interior side of the IGU, where an overall width between the first edge and the second edge measured perpendicular to the longitudinal direction of 40 mm or less.
