Abstract (en)
[origin: WO2019202218A1] The invention relates to a nose brace (1) configured to be applied to the face of a subject and having: - a shaping layer (3) in sheet form, configured to conform to a nose part by bearing on a face part, the shaping layer (3) having an inner face (5) with a shape complementing a digitally predefined model of the face part, - the shaping layer (3) having a shaping zone (13) configured to conform to the nose part, - the shaping layer (3) having a first upper positioning zone (15) configured to bear on a forehead part of the face, - the shaping layer (3) having second and third lower side positioning zones (17, 19) which are each configured to bear on a face part near the nose part. The invention also relates to a method for manufacturing a nose brace (1).
