Abstract (en)

[origin: WO2019201955A1] Proposed is a sensor assembly (1) for a seat cushion (2) and/or an exercise ball (12) and/or a balancing board (19), the sensor assembly (1) comprising: at least one controller (3), said controller (3) having at least one acceleration sensor unit (14) and/or inclination sensor unit (4) for detecting at least two-dimensional acceleration data or inclination data, and said controller (3) having at least one radio interface (5) for outputting the acceleration data and/or the inclination data. The sensor assembly (1) has at least one sensor fastening means (6) on which the controller (3) is positioned, said sensor fastening means (6) being designed to be fastened to the seat cushion (2) or the exercise ball (12) or the balancing board (19).
