Abstract (en)
[origin: US2019325687A1] This disclosure relates to a banknote validator. The banknote validator comprises a banknote path formed within an interior of the banknote validator to transport a banknote from an opening of the banknote path through the interior of the banknote validator, one or more banknote edge detection surfaces each configured to provide images of edges of a banknote in the banknote path, an image sensor configured to capture the images of the edges of the banknote provided by the one or more banknote edge detection surfaces, a steerable drive wheel at least partially disposed within the banknote path, the steerable drive wheel operable to reorient a banknote in the banknote path, and the steerable drive wheel operable to move from a first position to a second position to angle the steerable drive wheel in relation to the banknote path.
