Abstract (en)

[origin: WO2019191796A1] The invention relates to a swimming pool wall stand (1) for constructing a swimming pool, comprising at least one vertical support (2), wherein each vertical support (2) has a support profile with a support height (3) and a side support width (4) facing away from the tank, at least one floor support (6) which is formed at least on one side with respect to the support width (4) and is connected to the vertical support (2), optionally at least one horizontal element (7) which is designed to be coupled to the vertical supports (2) to reinforce two or more adjacently arranged vertical supports (2), wherein the vertical support (2) has a plurality of receiving means (8) at least along the support height (3), and at least one holding element (9) and/or the optional at least one horizontal element (7) having at least one coupling means (10) which is complementary to the shape and function of the receiving means (8) of the vertical support (2), wherein the at least one coupling means (10) is arranged on one side facing the vertical support (2), and wherein the holding element (9) has, at least on a side facing away from the tank, a receiving arm (11) projecting from the support width (4) and having a holding element upper side (12) for vertically and height-adjustably supporting at least one tank wall section (13) having a tank edge (14). The invention further relates to a swimming pool comprising such swimming pool wall stands, and to a method connected thereto for constructing a swimming pool.
