SYSTÈME DE MODULES DE CONNECTEUR ENFICHABLE BLINDÉS POUR CONNECTEURS ENFICHABLES INDUSTRIELS MODULAIRES

Abstract (en)

[origin: WO2019201390A1] The invention relates to a system consisting of a first plug connector module (2) and a second plug connector module (3), each of which is to be used in a modular industrial plug connector. The first plug connector module (2) has a first shield transfer element (5), and the second plug connector module (3) has a second shield transfer element (6). A cable connected to the plug connector module (2, 3) can be secured on a connection side (A) of each shield transfer element (5, 6), and the shield transfer elements (5, 6) can be brought into electric contact with each other on the plug side.
