Abstract (en)
The present disclosure provides a heat not burn (HNB) consumable comprising an aerosol-forming substrate having upper and lower surfaces spaced by opposing longitudinally-extending transverse surfaces. The substrate has a width between the transverse surfaces, a depth between the upper and lower surfaces and a length perpendicular to the width and depth. The aspect ratio of the width to the length is between 1:1 and 1:5. The aspect ratio of the width to the depth is greater than 1:1 (such that the width is greater than the depth). The aspect ratio of the length to the depth is greater than 1:1 (such that the length is greater than the depth). At least one of the upper, lower or transverse surfaces is a curved or rounded surface or comprises a curved or rounded surface portion.
