Abstract (en)
    First classifying means (102) of a learning system (S) performs classification relating to data based on a machine learning model. Second classifying means (103) performs classification relating to the data based on a predetermined rule. Determining means (104) determines whether the rule is to be learned based on statistical information relating to data satisfying the rule. Training means (106) executes training processing of the rule that is determined to be learned by the determining means (104).
