Abstract (en)

[origin: WO2019204839A1] The invention relates to a set comprising an in particular self-adhesive mat (1) and an object (11), such as a vessel, for example, wherein the mat (1) is formed at least partially from an elastically deformable material and on its underside has a smooth surface (9), and wherein the object (11) can be releasably fastened by means of a connection device to an upper side of the mat (1), wherein the connection device comprises a receiving element and a connection piece (14) interacting therewith, which are in particular designed to be plugged into each other. According to the invention, the connection device is designed to be lockable to ensure a connection that a small child is unable to release.
