Abstract (en)

[origin: WO2019242964A1] In order to achieve an alternative cabling (10) in a rail vehicle (2), the use of a multi-wire cable (12) having four twisted wire pairs (14), which are shielded from one another, or of an optical cable (16) as cabling for the rail vehicle (2) is proposed, control data being transferred via a field bus system (6) and further data being transferred via an Ethernet system (8), all data being transferred via the common cable (10).
