Abstract (en)

[origin: WO2019206934A1] The invention relates to a connection device for a discharge system for draining traffic surfaces, the connecting device having an attachment pipe, which can be connected to an attachment for drawing off water, and a discharge member, which can be connected to a sewage system. The invention is characterised in that a casing pipe (10) is arranged between the attachment pipe (11) and the discharge member (12), the casing pipe (10) extending into the discharge member (12) and having a supporting flange (13) which is arranged between the axial ends of the casing pipe.
