Abstract (en)
[origin: WO2019206972A1] The invention relates to a spacer for keeping a wall connection-side joint free, for example when laying a rigid floor covering, comprising a spacer element (2, 2.1) with a thickness, which corresponds to the width of the joint to be kept free, and an angle bracket (3, 3.1) with a strip-shaped holding limb (4, 4.1) and a holding shaft (5, 5.1) which is connected to the holding limb (4, 4.1) at the end thereof and which protrudes from the holding limb (3, 3.1). A bore (7) which extends in the vertical direction of the spacer element and into which the holding shaft (5, 5.1) engages is introduced into the spacer element (2, 2.1).
