Abstract (en)

[origin: WO2019179549A1] The present invention relates to a locking system for windows and doors for retrofitting with an attachment for the existing rolling, locking or mushroom head pin and a closing piece in exchange for the existing closing piece. The attachment is provided with a tongue which, in the locking position, engages into a receiving pocket in the closing piece. Furthermore, the invention relates to a window or a door with improved protection against forced opening, in which at least one locking system according to the invention is installed, and to a method for retrofitting a window or a door with the locking system according to the invention.
