Abstract (en)

[origin: WO2019206665A1] The invention relates to a domestic refrigeration appliance (1) and to a method for producing the domestic refrigeration appliance (1). The domestic refrigeration appliance (1) comprises a heat-insulated body (2) comprising an insulating foam and having an inner container (3). The inner container comprises a foam-side surface (12) facing the insulating foam and comprises an opening (30) and delimits a coolable interior (4) intended for the storage of food. The domestic refrigeration appliance (1) comprises a refrigeration device (9) for cooling the coolable interior (4), and a backing part (21) secured in the region of the opening (30) and foamed into the insulating foam. The inner container (3) comprises a collar-like wall (31), which protrudes from the foam-side surface (12), surrounds the opening (30) of the inner container (3) and comprises at least one latching means, and the backing part (21) comprises at least one counter latching means (26), which is latched with the at least one latching means in order to secure the backing part (21) in the region of the opening (30) of the inner container (3).
