Abstract (en)

[origin: WO2019206539A1] The invention relates to a method for determining augmentation information for an image, comprising detection of location information of a mobile device, loading of at least two reference information items, each comprising at least one reference image, onto the mobile device depending on the detected location information, detection of image information comprising at least one actual image by the mobile device, comparison of the actual image with the reference images, detection of a match between the actual image and one of the reference images, and, in the event that a match is detected, loading of augmentation information items associated at least with the loaded reference information items.
