Abstract (en)

[origin: CN112442879A] The present invention provides an iron (1) comprising an ironing bottom plate (12), a heating body (3) comprising a vaporizing chamber (33) having a vaporizing surface (33A) onto which water is sprayed to produce steam, and a cavity (5) containing a removable scale collection container (4), the heating body (3) comprising a partition wall (34) defining laterally the vaporizing chamber (33) and interrupted at an outlet orifice (38), wherein steam escapes from the vaporizing chamber (33) towards the steam distribution circuit through an outlet orifice (38), and is characterized in that the scalecollection container (4) has a front end at a distance from the outlet orifice (38) of less than 1 cm or passes through the outlet orifice (38).
