Abstract (en)

[origin: JP2022045889A] To provide a rotor assembly for a vacuum pump capable of easily improving strength of the rotor assembly against disassembly.SOLUTION: A rotor assembly for a vacuum pump comprises a rotor body 15. The rotor body rotates around a rotation axis 13 when a vacuum pump is operated, and a reinforcing band 29 is wound around an outer periphery 25 of the rotor body in an annular manner around the rotation axis at least once completely.SELECTED DRAWING: Figure 1
