Abstract (en)

[origin: WO2020234346A1] Combined grinding and brushing device that defines an axis of rotation (22) about which the combined grinding and brushing device (10) is rotated during the use thereof, wherein the combined grinding and brushing device (10) has a main body (24) that is configured substantially in the form of a disc, ring or plate and extends in a circumferential direction about the axis of rotation (22), wherein the main body (24) has, in a first region (42), an abrasive layer (32) that is arranged directly on the main body (24) and extends in the circumferential direction at least partially about the axis of rotation (22), and wherein the main body (24) has, in a second region (44) spaced apart from the first region (42), a brush (34) that is arranged directly on the main body (24) and extends in the circumferential direction at least partially about the axis of rotation (22).
