Abstract (en)

[origin: WO2019211206A1] The invention relates to a child seat (50) for attaching to a motor vehicle seat, comprising an impact shield (52), wherein the impact shield is prevented from being dismantled from a main body (51) in at least a first configuration and/or in at least a first state of use of the child seat (50) and/or is prevented from being partially or at least fully mounted on a/the main body (51) in at least a second configuration and/or in at least a second state of use of the child seat (50), and/or wherein possibilities for configuring and/or installing the child seat (50) are dependent on the fastened state of the impact shield (52).
