Abstract (en)

A kit is provided to provide a roof light system (1) to form a light conduit between an inclined roof of a building and an interior building room with a ceiling. The kit for forming the roof light system (1) comprises a roof module (4), a ceiling module (5), and a shaft arrangement (6). The width (WCM) of the ceiling module (5) corresponds to the width (WRM) of the roof module (4). One or more of the sections (61, 62, 63, 64) are formed as a piece of cloth of a flexible cloth material. Tightening means (56) may be provided to keep the cloth of the shaft sections tight. A support assembly (7) may provide for structural stability of the shaft arrangement (6).
