Abstract (en)  
[origin: EP3789558A1] A light guiding system (1) is provided to form a shaft arrangement (6) which may create a light conduit between an inclined roof of a building and an interior building room with a ceiling. The light guiding system (1) comprises a roof module (4), a ceiling module (5), and the shaft arrangement (6). Two or more of the sections (61, 62, 63, 64) are formed as a piece of cloth of a flexible cloth material from a number of non-coherent parts.
