Abstract (en)

[origin: WO2019215412A1] The invention relates to a physical contention device for mobility-impaired persons. Said device consists of a cushion having, in the front central region, a through-housing, the cross-section of which matches a complementary retaining bar, said retaining bar being retractable and having a height of 150 to 500 millimeters and a cross-section of 50 to 150 millimeters.
