Abstract (en)
[origin: WO2019214964A1] A rollator securing unit of a means of transportation has a bearing element (24, 42, 54) which, by bearing on a seat surface (30) of a rollator (3), secures the rollator (3) in its position when an external load is placed on the bearing element (24, 42, 54) from above. The bearing element (24, 42, 54) forms a horizontally extending bearing surface whose height is adjustable. The rollator securing unit according to the invention is easy to operate, provides a secure seat for the passenger, is of a robust design and can also be produced cost-effectively.
