Abstract (en)

[origin: WO2019215774A1] The method for making spacer structures, preferably constituted by the joining of at least one pair of longitudinal elements (3) parallel and suitably spaced and a plurality of transversal elements (4) suitably spaced, provides arranging a first supply assembly (10) and a second supply assembly (100) for supplying the longitudinal elements (3) along a longitudinal direction (A), each comprising at least one supply device (5, 6) for a longitudinal element (3).
