Abstract (en)

[origin: WO2019214936A1] A pressure slip casting mould having a mould cavity (18) for pressure-casting a cast part (20) and mould parts (10-16) surrounding the mould cavity (18) in a pressure slip casting position, wherein at least two (10, 11) of the mould parts, specifically at least one first (10) and one second (11) mould part, at least during a demoulding process, are each displaceable independently of one another in at least two different directions and/or in a direction that is neither parallel nor perpendicular to a displacement direction of a third mould part.
