Abstract (en)

[origin: WO2019214934A1] The present invention relates to a hand-operated truck (1) suitable for lifting and moving a flexible container. The truck comprises an elongated support frame (3), a pair of rotatable carrying wheels (7) rotatably connected to a lower part of the support frame so that the support frame is pivotably arranged in relation to the carrying wheels between an upright position and a rearwardly tilted transport position, at least one carrying element (6) connected to an upper part of the support frame (3) and projecting forwardly from the support frame, and the support frame is pivotably arranged in relation to the carrying wheels between the upright position and a forwardly tilted load position. The truck comprises a pair of spaced apart rotatable support wheels (22) disposed at a distance from the support frame (3) on a front side of the support frame, and the support wheels are pivotally connected to the support frame so that the support frame is allowed to pivot in relation to the support wheels.
