Abstract (en)
[origin: WO2019215161A1] The invention relates to a fuel dispensing unit (1) for refuelling a vehicle. The fuel dispensing unit (1) comprises a hydraulics part (4), a display part (3) positioned above the hydraulics part (4), and a hose storage space (2) housing at least one hose (7) at the end of which a nozzle (6) is connected, the hose storage space (2) comprising a front side (12), a rear side (13) and at least one end side (14). The fuel dispensing unit (1) is characterized in that a section (15) of the at least one end side (14) is tapering and that at least one nozzle boot (8) for holding the nozzle (6) is arranged in the tapering section (15). The method also relates to a method for manufacturing a fuel dispensing unit (1).
