Abstract (en)
[origin: EP3791749A1] A shampoo beauty bed, comprising a shampoo bed body. The shampoo bed body comprises a ceramic basin (1), a backrest (2), a seat cushion (3), a foot cushion (4), and a main frame (9). The ceramic basin (1) is mounted at the end of the shampoo bed body by means of a ceramic basin support (10); the backrest (2), the seat cushion (3), and the foot cushion (4) are arranged in sequence at the left side of the ceramic basin (1), and two ends of the seat cushion (3) are rotatably connected to the backrest (2) and the foot cushion (4) respectively by means of a connecting shaft (24); the lower end of the foot cushion (4) is rotatably connected, by means of a foot cushion extension rod (21), to a foot cushion support frame (6) hingedly connected on the main frame (9); a seat cushion support rod (22) and a support rod (16) are hingedly connected to the left and right positions of the lower end of the seat cushion (3); the seat cushion support rod (22) is rotatably connected to the foot cushion support frame (6); the backrest (2) is rotatably connected to the vertical segment of the main frame (9) by means of a backrest support frame (17). A motor (11) provided drives an electric rod (8) to move, and expansion and contraction of the electric rod (8) enables simultaneous adjustment of the backrest (2), the seat cushion (3), and the foot cushion (4). Driving is performed simply by one motor (11), and different adjustment requirements can be achieved, thereby implementing easy operation.
