Abstract (en)
Described is, among other things, a dust container (1) for a vacuum cleaner. The dust container comprises a dust bag (5), made of an air permeable material, and a connector plate (3) having a hole, surrounding an opening (9) in the dust bag (5). The connector plate (3) comprises a central portion (11) surrounding said hole, and an extending portion (13) projecting from the central portion (11). The extending portion (13) at a first section (112) is configured to be bent in a first direction (A). The extending portion at a second section (114) is configured to be bent in a second direction (B) being opposite to the first direction (A).
