Abstract (en)
[origin: EP3791768A1] The present invention relates to a dishwasher comprising a washing tub (1), at least one rack which is disposed in the washing tub (1) and wherein the items to be washed are placed, at least one spray arm (2) which is connected to the water line so as to spray water into the rack and the washing tub (1); and one or more than one additional spray arm (3) which is positioned in the vicinity of the spray arm (2) and which enables a region of the washing tub (1) to be swept with water by means of the water coming from the water line, the additional spray arm (3) having a body (4), a lid (5), at least one spraying member (6) which is pivotably attached so as to rotate around the point of attachment to the body (4), a shaft (10) which is positioned at the center of the body (4) and which rotates around its own axis with the effect of the water coming from the water line, a first pin (11) which extends perpendicularly to the shaft (10) and a first plate (13) which is contacted by the first pin (11) and which moves the spraying member (6) by linearly moving in the contact direction of the first pin (11).
