Abstract (en)

[origin: WO2019219807A1] The subject of the present invention is a seal (1), in particular for a rotary ball valve fitting (2). The seal (1) according to the invention is characterized in that it comprises an annular body (4) that is resilient, flexible and provided with a radial lip (4') and a rigid sealing ring (5) that are made in one piece. A further subject of the invention is a valve of the abovementioned type that is provided with a seal according to the invention.
