Abstract (en)

[origin: WO2019219800A1] The invention relates to a fine tuner for a string musical instrument (10), comprising a main body (24) having an underside (44), a top side (40), a first abutment region (80) and having a second abutment region (84) for a string (22), wherein the second abutment region (84) is spaced apart from the first abutment region (80), a gripping element (86) for gripping a string portion (132) that is located between the first abutment region (80) and the second abutment region (84), and a setting device (88), which fits on the main body (24) and acts on the gripping element (86), wherein a position of the gripping element (86) relative to the main body (24) is settable in a fixable manner via the setting device (88) and the position of the gripping element (86) determines a deflected position of the string (22) at the fine tuner, wherein the gripping element (86) entrains the string portion (132) counter to a direction (48) that extends in a direction from the top side (40) to the underside (44).
