Abstract (en)
[origin: WO2020011729A1] The present invention relates to a control apparatus for controlling the power consumption of components (2..6) of a building management system, particularly a lighting system, wherein the control apparatus (1) is designed to determine a permissible modification in power consumption for each component (2..6), to determine a desired modification to the power consumption of the building management system and to control the power consumption of the components (2..6) on the basis of the desired modification and the permissible modification.
