Abstract (en)
[origin: CN112515971A] The invention relates to a flexible pacifier. The pacifier provided by the invention comprises a suction nozzle and a baffle plate. The suction nozzle has an end portion, a shaft portion, and a base portion. The end portion has a length and a width greater than a length and a width of the shaft portion. The base is adapted to connect the suction nozzle to the baffle plate and has a pleat configured to permit movement of the suction nozzle toward and away from the baffle plate and rotation about a central point of the base.
