Abstract (en)

[origin: US2021087008A1] A packaging machine for packaging goods in film packages, equipped with a device for receiving and holding a surface element roll, so as to process it in a packaging machine by unrolling the surface element and introducing the surface element into the packaging machine, comprising an axle to be incorporated into the surface element roll on its rotational axis of symmetry, wherein the axle is received in a swivel receiver, and the axle for unrolling the surface element is held with the swivel receiver in a roughly vertical alignment.
