Abstract (en)

[origin: CA3100411A1] The invention relates to a heat generator (10) for hookahs, comprising a circumferential wall (13), a base (18), a cover part (11) and a plate (120), which is arranged in a movable manner in the interior of the heat generator and is intended for accommodating lit coals or coal substitutes, wherein the circumferential wall of the heat generator contains at least one slot (14) extending helically between the base and the cover part, and the plate has at least one grip part (16), which projects through the slot and is guided in the slot, and the plate can be adjusted in a stepless manner relative to the base, and also relates to a hookah tobacco head for positioning on the heat generator.
