Abstract (en)
[origin: GB2574036A] A shelter such as a tent or awning for attaching to a structure comprises a sealing member and a sealing tensioning device. The sealing member is configured to be attachable to at least a portion of a flexible panel of the shelter and the tensioning device has a first part attachable to a structure attachment point of the shelter and a second part attachable to the structure. The flexible panel of the shelter may be releasably attachable to the sealing member. The part attachable to the structure may be a keder or kador strip, a bead received in a channel provided on the structure
