Abstract (en)

[origin: WO2019224146A1] The invention relates to an optical arrangement for a spectroscopic imaging method, comprising a multi-core fibre (7), which has at least one first fibre core (1) for guiding a first illuminating light and a second fibre core (2) for guiding a second illuminating light, and a wavelength-dispersive beam-combining element (12), which is designed to spatially superpose the first illuminating light and the second illuminating light in an object space (14). A spectroscopic imaging method comprising the optical arrangement is also described.
