Abstract (en)
The utility model discloses a state indicating module used to indicate an on and off state of an automatic transfer switching equipment, including: a housing detachably assembled to the body of the automatic transfer switching equipment; a first micro switch assembly detachably installed in the housing and including a first micro switch button, a position of the first micro switch button indicating an on and off state of a first power supply; a second micro switch assembly detachably installed in the housing and including a second micro switch button, a position of the second micro switch button indicating an on and off state of a second power supply; and a transmission assembly movably mounted to the housing and configured to transmit a movement of a driving rod to the first micro switch button and the second micro switch button. The state indicating module is convenient for installation and maintenance and one or more state indicating modules can be set according to customer needs. The module is small in size, easy to be installed and wired, and can be switched-on-triggered or switched-off-triggered according to the characteristics of the mechanism.
