Abstract (en)

The present disclosure relates to a male plug comprising a housing for accommodating at least one pin and a coupling member for mating with a female plug through a panel, with means being provided for interlocking the housing and the coupling member. Further, the present disclosure relates to a pin cover for protecting the at least one pin of such a male plug and a system of such a male plug and such a pin cover. In addition, the present disclosure relates to a method for providing a male plug of such a system.
