Abstract (en)

[origin: WO2019236080A1] The inventor herein discloses destructive (self-destructing) documents useful for the protection of confidential information. The invention comprises a document which can be easily and instantly broken down into dozens of individual components, hence obliterating any information contained thereon. As the self-destruction of the document requires no extraneous equipment for destruction and guarantees elimination of readable data, the invention represents a vast improvement over the state of the art. Further refinements allow simple mass production of the invention using current manufacturing equipment and technologies. Numerous embodiments of the document of the invention specialized for different applications are illustrated and described.
