Abstract (en)  
[origin: EP3799729A1] The invention discloses a variable-ventilation filter tip and a cigarette. The above filter tip includes a filter element and a coating layer, wherein the coating layer wraps the filter element; the filter element includes a smoke inlet end and a smoke release end; a phase-change ventilation area and a non-phase-change ventilation area are arranged on the coating layer, a plurality of first ventilation holes are arranged in the phase-change ventilation area, and a plurality of second ventilation holes are arranged in the non-phase-change ventilation area; outside air penetrates through the coating layer through the first ventilation holes and the second ventilation holes to enter a part of the filter element; a part in the filter element close to the smoke inlet end is provided with a starch tube; and a phase-change material is filled in the first ventilation hole; and a phase-change temperature of the phase-change material ranges from 45°C to 60°C. The invention further discloses the cigarette applying the above filter tip. According to the invention, the cigarette may be smoked in an ignition manner or a non-ignition heating manner.
