Abstract (en)

The present invention is notably directed to methods and systems for generating a CEP-stable optical pulse of optical carrier frequency $f_{<\text{sub}>i}</\text{sub}>$ from input optical pulses, the input optical pulses having an optical carrier frequency $f_{<\text{sub}>p}</\text{sub}>$ and pulse duration $T_{<\text{sub}>p}</\text{sub}>$. A birefringent medium, a non nonlinear medium, a dispersive optical system, a parametric device (DFG) are successively used to achieve the generation.
