Abstract (en)

[origin: CA3102351A1] In a first aspect, the invention relates to a device for hyperthermal treatment of itching, comprising at least one treatment surface, which can be heated to a treatment temperature of 40°C to 65°C, by heating of at least one heating element, and which is controllable by a control device, wherein the device has at least one interface and is configured for powering of the device by a mobile appliance and/or for data exchange with a mobile appliance and/or for control by a mobile appliance via the interface. In a further aspect, the invention relates to a system composed of device and mobile appliance, wherein the device is configured for powering by the mobile appliance and/or for data exchange with the mobile appliance and/or for control by the mobile appliance via an interface.
