Abstract (en)

[origin: WO2019234254A1] The invention relates to a game case (1) for the transport and mobile operation of an integratable game console, said game case (1) having an upper shell (2) and a lower shell (3) and the upper shell (2) being connected to the lower shell (3) removably or such that it can be folded along a longitudinal side. The upper shell (2) comprises a screen (4) for outputting a signal of the integratable game console and said screen (4) occupies at least half of the surface of the upper shell (2). The lower shell (3) comprises at least one shaped element (5) and said shaped element (5) has at least one recess (6) for interlockingly accommodating the game console. The game case (1) has a ready-made wiring (7) which comprises at least one power supply line (7a) or a signal line (7b), and at least one power supply line (7a) or signal line (7b) is inserted into the recess (6) to connect to the game console for connection to a power source or to the screen (4) to output a signal of the game console. The invention further relates to a multimedia case comprising an integrated monitor or any other integrated image display device.
